Meeting with Representative Arriola

On 4-1-93 Pat Davenport, from Representative John Arriola's office, called to ask that someone from DSF meet with the representative to discuss the Saad site. I arranged an 11:00 meeting on 4-2-93 to include Nancy Thomas, Project Manager, and myself. Essentially, Ellis Saad had asked Rep. Arriola for assistance in getting back on his property because he was losing money. Mr. Saad (ie; The Paint & Body Shop leasing Saads property) has been off the property for several months under an agreement worked out with EPA and the PRP's investigating the site.

We outlined a brief history of the site including past difficulties in getting compliance with environmental laws and regulations. We also explained that we were in the final stages of clean-up and may or may not need additional access depending on what is being proposed in the upcoming report (due 4-14-93). Ellis Saad presently has the keys to the property since the term of Saad's and EPA's previous agreement was up. However, EPA is in the process of extending this agreement. Rep. Arriola would like for us to summarize for him what kind of waste (hazardous or not) and how much waste has been disposed this far. Ellis Saad has told him we are not finding anything. He would also like to see some pictures.

anything. He would also like to see some pictures. We agreed to put some information together. He is willing to wait until after submittal of the April 14, report documenting the most recent phase so our summary will be up-to-date.
